Professional Summary

Full Stack Developer with 2+ years of experience in MERN Stack development, WordPress development, REST API integration, and database management. Experienced in building scalable web applications, eCommerce platforms, business websites, and custom software solutions. Passionate about delivering high-performance applications with excellent user experiences and clean, maintainable code.

Skills

Frontend: React.js ,JavaScript (ES6), HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Express.js, Node.js, REST APIs, JWT Authentication

Database: MySQL, MongoDB, SQL SERVER

Tools: Git, GitHub, Postman, Figma, VS Code

Professional Experience

Software Developer (MERN Stack) | Siddhi Software System 03/2024 – 03/2026

- Developed and maintained multiple full-stack web applications using React.js, Node.js, Express.js, and MongoDB for business automation and customer-facing platforms.
- Designed responsive user interfaces with React.js, improving user engagement and ensuring seamless functionality across desktop, tablet, and mobile devices.
- Developed secure RESTful APIs with authentication and role-based access control, enabling scalable and secure application architecture.
- Optimized MongoDB database performance through schema design improvements, indexing, and query optimization.
- Integrated third-party APIs, payment gateways, and external services to enhance application functionality.
- Collaborated directly with clients to gather requirements, provide technical solutions, resolve issues, and deliver projects within deadlines.
- Managed deployment, hosting configurations, SSL implementation, and production support for web applications and websites.
- Contributed to WordPress development projects, including website customization, performance optimization, and SEO implementation.

Software Developer Intern | Numetry Technology 09/2023 – 03/2024

- Developed responsive and interactive web applications using React.js, JavaScript, HTML5, and CSS3, ensuring optimal performance across multiple devices and browsers.
- Integrated RESTful APIs to fetch and display real-time data, improving application functionality and enhancing user experience.
- Implemented Redux for centralized state management, resulting in cleaner code architecture and improved scalability.
- Collaborated with senior developers to develop reusable UI components, reducing code duplication and improving development efficiency.
- Participated in debugging, testing, and code review processes to identify issues and maintain high code quality standards.
- Applied modern JavaScript (ES6+) concepts and React best practices to build maintainable and scalable frontend applications.
- Worked in an Agile development environment, contributing to feature implementation, sprint planning, and project discussions.

Projects

SugarTrack

- Currently developing **SugarTrack**, a full-stack digital marketplace platform that enables farmers to directly sell their agricultural products to buyers online.
- Built the application using the **MERN stack (MongoDB, Express.js, React.js, Node.js)** with a scalable and responsive architecture.
- Designed secure user authentication and role-based dashboards for Farmers, Buyers, and Admin management.
- Implemented real-time order tracking with **live delivery location updates** for transparent logistics management.
- Developed product listing, inventory management, and order processing modules to streamline buying and selling operations.
- Created an admin panel to monitor users, transactions, deliveries, and platform activities efficiently.
- Focused on improving farmer accessibility, reducing middlemen dependency, and enhancing the digital agriculture supply chain.

Blinkit-Inspired Grocery Delivery Platform

Tech Stack: React.js, Node.js, Express.js, MySQL, JWT, Nodemailer

- Developed a fully responsive and dynamic grocery delivery platform inspired by Blinkit, customized according to client-specific business requirements and branding.
- Built a secure role-based authentication and authorization system with dedicated access controls for Administrators, Managers, and Users.
- Developed a comprehensive Admin Dashboard enabling management of products, categories, users, orders, and platform settings from a centralized interface.
- Implemented dynamic content management features allowing administrators to update Privacy Policy, Terms & Conditions, footer content, and other website information without code changes.
- Designed and integrated order management workflows, enabling administrators and managers to monitor, process, and track customer orders efficiently.
- Implemented automated email notifications using Nodemailer to send order confirmations and order details directly to customers after successful purchases.
- Developed RESTful APIs and optimized database operations to ensure smooth performance, scalability, and real-time data management.
- Delivered a mobile-friendly user experience with responsive design principles, ensuring seamless functionality across desktop, tablet, and mobile devices.

Fruit Shop E-Commerce Website

Tech: React.js, Node.js, Express.js, MongoDB

- Built complete online ordering system with product listing, cart, checkout
- Developed backend CRUD APIs and integrated MongoDB database
- Implemented authentication and order management features
- Deployed application with responsive UI for all devices

News Application

Tech Stack: HTML, CSS, JavaScript, Bootstrap, REST API

- Built real-time news fetching app using REST API integration
- Added category filtering, search functionality, responsive design
- Optimized cross-browser performance

Education

G H Rasoni Institute Of Business and Mangement Jalgaon, Master Of Computer Application

2022 - 2024
